The 6th National Conference on Biological Control 2020 aims at addressing the important issues in crop protection covering organic farming, biodiversity conservation and biointensive integrated pest management. The NCBC 2020 will provide a platform where fresh knowledge, experiences, recent innovations and concepts in the practical implementation of biological and integrated controls for pests and diseases of crops can be presented, discussed and disseminated by researchers from leading academic institutes and research organizations.

Conference Themes

-  Biodiversity & Biosystematics of Biocontrol agents
-  Biological Control of Pests
-  Biological Control of Plant Diseases
-  Biointensive IPM Modules
-  Molecular Biology & Bioinformatics in Biocontrol
-  Biocontrol - Compatible Approches
-  Biocontrol and Allied Industry

SBA award will be given during the conference.
