

Training Programme on

Unique Identification characteristics of insect pests
and their damaging symptoms and management
18-22, March 2024

(Hybrid mode)

ICAR- National Bureau of Agricultural Insect Resources

P. Bag No:2491, H.A. Farm Post, Bellary Road, Bengaluru - 560 024.

Karnataka.

Background and Brief course outline

Insects are largest and diverse group of fascinating animals on the earth because of their life styles, habits, the habitats they occupy. There are about one million described species on this earth which encompasses both harmful and beneficial insects, identification of insect pests and their damaging symptoms are very important while devising the management strategies. This training will expose the technical officials in sharpening their knowledge on identification of insect pest infesting different crops. The course will also help them in understanding the basic principles of insect pest management especially, management of insect pests through biological control and its compatible approaches.

About the Institute

ICAR-National Bureau of Agricultural Insect Resources (ICAR-NBAIR), Bengaluru, was established in 1993, is the nodal agency in the country that organizes biological control research at the national level with 28 centers spread across the country for carrying out field studies on bio suppression of pests of crops. The Bureau has carried out basic research on the biosystematics of important groups of insect bio agents and other insects such as trichogrammatids, chrysopids, aphids, chrysopids, coccinellids, braconids, tephritids, pentatomids, tachinids, scabaeids, thrips, scales, mealybugs, plastygastroids, mites, and spiders etc. The Bureau also works on strain development, molecular characterization, mass production technologies, semiochemicals, biopesticides for insect and disease management.

Course duration

The course duration is five days scheduled from 18-22 March, 2024.
